

pascom Alarm Transmitter Tx75D

Alarm transmitter which transmits its position

The pascom alarm transmitter Tx75D automatically sends its position to the alarm receiver when the patient crosses a border. The helping team knows where the person in danger is to find.

People who suffers from dementia or are disoriented, should be able to move where they want, without exposing themselves to danger.

Specifications:

Weight: 18 g incl. battery
Dimensions: Diameter 36 mm,
Thickness 13 mm
Frequency: 869 MHz
Battery: 1 MAXELL CR2450
IP classification: IP67
