

Item No. XS-O2M1000005100

pascom O2xS Furniture lock

Installation without wiring for left and right cabinet doors

The pascom O²xS Furniture lock can be used for all doors such as wood, steel and aluminium doors with a thickness up to 20 mm.

It can be installed in a vertical or horizontal position for right and left cabinet doors. Three different closing levers can be selected.

Replacement of the battery is possible in an assembled condition by a suitable tool. When presenting the card, a weak battery status is signaled visually and acoustically.
