

Item No. XS-O2Dxxxxxxxxxx

# pascom O2xS door handle

**Mounting without additional drilling and without wiring**

## Set includes

- Electronic door handle
- Spindle
- Mechanical door handle
- Battery and Allen key

The pascom O<sup>2</sup>xS door handle is compatible with many European lock standards. The different versions allow the use in all common doors, such as wood, steel and aluminium as well as narrow frame doors with a backset of more than 20 mm.

An extensive wiring is not necessary and existing holes can be generally used.

The reader unit with communication electronics as well as the mechanics and the power supply is located directly in the door handle.

A low battery status is signaled acoustically when actuated. Replacement of the battery is possible in an assembled condition by a simple tool.
