

Item No. TV-MOWA0750AB000

pascom swivel arm for wall mounting

750 / 9002 / A+B

With the swivel arm your patients are able to set the suitable distance to the TV set for themselves. Six hinges ensure the highest level of mobility. The internal power and data cables ensure optimal hygienic conditions.

In patient care or in emergencies, the swivel arm is simply slid to the wall. Depending on the structural conditions we offer suitable wall brackets for the mounting of the swivel arms.

Note: The swivel arm serves as a mount for the TV. Patients may not pull themselves up with it.

Technical specifications

Construction:	6-hinged swivel arm for wall mounting
